Flight simulator android mod apk

FLY MILITARY AIRCRAFT AND PASSENGER AIRLINERS:Turboprop Flight Simulator is a new 3D aircraft simulator game, which puts you in the pilot seat of aircraft derived from the Airbus A400M Atlas tactical aircraft, and regional aircraft ATR 42 / ATR 72. FUN* Pilot three versions of military aircraft: tactical cargo, coast guard, and special operations. * Pilot two regional aircraft, plus military variants of air early warning. * Learn to fly with training missions (teach the basics of flying, taxiing, takeoff and landing). * Challenge yourself on various missions and get your wings. * Explore the interior of the plane directly (in most levels, and freeflight). * Interact with various items (doors, cargo roads, strobes, headlights). * Drive land vehicles. * Load, unload, and airdrop supplies and vehicles with cargo planes. * Takeoff and landing on improvised runways (and airports, for sure). * Fly without restrictions in freeflight mode, or create flight routes on the map. * Fly in various times of the day, fog and wind conditions. OTHER FEATURES:* NEW AIRCRAFT SIMULATOR GAMES & FREE made in 2017 and updated in 2018! * NO COMPULSORY ADVERTISING! Optional only, which is appreciated between flights. * Great 3D graphics (with detailed cockpit for all aircraft). * Realistic physics for flight simulation. * Complete pilot controls (including steering, flaps, spoilers, thrust rewrinds, automatic brakes and landing gear). * Multiple control options (including mixed slope sensor & stick/c.k.a). * Multiple cameras (including cockpit cameras with captain and copilot positions). * Close to realistic engine sounds (turbine and propeller sounds recorded from real aircraft). * Partial and total aircraft destruction (clipping wings/tips, full wing separation, tail separation, and major fuselage damage). * Big island with lots of airports. * Selection of measurement units for air speed, flight altitude, and distance (metrics, flight standards, and imperial). Laminar Research Android 6.0 * Version: 11.4.6 \$0 X-Plane Flight Simulator (MOD, Unlocked) - a very interesting and interesting flight simulator on your android device. The developer of this game offers you to sit down for a large number of planes, and feel like a plane navigator. Fight in aerial combat, or just fly on a plane and enjoy the beauty and beautiful sunsets. The choice is your own, and the game has a huge number of vehicles to choose from. Fly around the world and earn points and coins that you can buy new planes. Updated to version 11.4.6! Precio especialmente con descuento! Vive una experiencia de vuelo genuina en cualquier parte del mundo y explora escenarios y aeropuertos en alta resolución con mapas satélite, edificios 3D, pistas, procedimientos y tráfico aéreo. Únete a vuelos en tiempo real, chatea con pilotos and join them in multiplayer. Pesawat Flight Management and interacts with ATC air controllers. Access Community-created design and customize aircraft, indicators, failures, and weather conditions. Become a real pilot! Manual/Tutorial: wiki.realflightssimulator.org/wiki/VUELA NOW:- Takeoff, landing, or full flight. -Automatic flight plan creation. ADVANCED FLIGHT PACKAGE (PRO only)- Various options for creating/editing/duplicating complex flight plans. - Date/time: PERS/REAL (day and night cycles)-Flight plans with departure, Arrival, APPROACH AND TRANSITION procedures (SID and STAR)- Aircraft: V-SPEEDS, GROSS WEIGHT LIMIT, FUEL CONSUMPTION, ESTIMATED FLIGHT TIME WITH FUEL CUSTOMIZATION, PASSENGERS AND CARGO.-Meteorology/Arrival Desk: PERS/NYATA - WIND/SPEED DIRECTION, MAIN METEOROLOGY (CLEAR, NIEBLA, RAIN, STORM, NIEVE), NUBES, NUBES BASE, REAL-TIME FLIGHTS (PRO only)- 40,000 real-time flights daily.- Real-time traffic from the world's 35 largest airports and their connected destinations.- Join the real-time flights available and take them to your destination.
